M+BONDS CONCEPT

03

M+BONDS INSPIRATION

04

m+bonds.

What do we mean by small? IT'S UP TO US!

Il mosaico è anzitutto materia spezzata e ridotta in piccoli elementi che creano superfici senza soluzione di continuità, in cui il giunto, moltiplicato e incorporato nel pattern, non divide ma lega tra loro le tessere.

Questo è l'elemento di grande forza che M+ oggi vuole sviluppare.

Se la superficie senza soluzione di continuità rappresenta oggi uno dei temi più importanti nell'interior e soprattutto nell'architettura, come possiamo lavorare nella direzione di sviluppare questo aspetto?

Ripensando la forma-mosaico non più in modo figurativo, come è nella tradizione, ma come elemento di costruzione di un pattern che amplifichi la vibrazione della materia.

Oggi la progettazione si muove in maniera sistemica, pensando atmosfere, relazioni tra materie M+, nelle sue divisioni Surfaces e Mosaics, propone una gamma di prodotti che possono facilmente essere messi in relazione.

BONDS è la raccolta di questi accostamenti di superfici.

Mosaic is first and foremost broken matter, reduced to small elements that create seamless surfaces, in which the joint, multiplied and incorporated in the pattern, does not divide but binds the components together.

This is the powerful element that M+ aims to develop. Surface is, today, one of the most important themes in interior and especially in architecture environments: how can we develop this aspect?

We are rethinking the mosaic form: it is no longer figurative, as it traditionally was, it becomes the element of the construction of a pattern that gives life to the material. Today every designer, architect, and interior designer thinks and works with a systematic approach, focusing on atmospheres and relationships between subjects.

M+, in its Surfaces and Mosaics divisions, offers a range of products that can be easily connected. Our unique collections can be combined to tell a complete story, "BONDS" is our vision of how to combine them.
